Consumer Price Index, Northeast Region – July 2015

Regional prices down 0.1 percent over the month and 0.2 percent over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Northeast inched down 0.1 percent in July, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau's regional commissioner, noted that this was mostly due to a 2.1-percent decrease in the energy index. The decline was moderated by an increase in the all items less food and energy index, which inched up 0.1 percent. Food prices were unchanged over the month. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Over the last 12 months, the Northeast all items CPI-U edged down 0.2 percent. (See [chart 1](#) and [table A](#).) The energy index fell 17.3 percent over the year, while the all items less food and energy index was 1.6 percent higher. Food prices also increased from July 2014, up 1.4 percent. (See [table 1](#).)

Chart 1. Over-the-year percent change in CPI-U, Northeast region, July 2012–July 2015

Source: U.S. Bureau of Labor Statistics.

Food

After edging up 0.2 percent in June, food prices were unchanged in July. Food at home prices decreased 0.3 percent, while food away from home prices increased 0.3 percent.

From July 2014 to July 2015, the food index increased 1.4 percent. Prices for food away from home rose 2.3 percent over the year and those for food at home increased 0.7 percent.

Energy

The energy index, which includes prices for household and transportation fuels, decreased 2.1 percent since June. This was mostly due to a 3.8-percent decline in electricity prices. Utility (piped) gas service and gasoline prices also decreased over the month, down 2.3 and 0.5 percent, respectively.

The energy index fell 17.3 percent since July 2014, mostly due to a 25.2-percent drop in gasoline prices. Prices for utility (piped) gas service and electricity also declined over the year, down 15.7 and 0.9 percent, respectively.

All items less food and energy

The index for all items less food and energy inched up 0.1 percent in July. Shelter prices rose 0.5 percent, led by higher prices for lodging away from home. Moderating the overall increase in the all items less food and energy index were lower prices for household furnishings and operations and apparel (-1.0 percent each).

Over the year, the index for all items less food and energy increased 1.6 percent, led by higher prices for shelter (2.5 percent), particularly owners' equivalent rent of residences (2.2 percent). Prices were also higher for several other categories including medical care and other goods and services, up 2.6 and 2.5 percent, respectively.

The Consumer Price Index for August 2015 is scheduled to be released Wednesday, September 16, 2015, at 8:30 a.m. (ET).

Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 4,000 housing units and approximately 26,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/homch17_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **Note: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The Northeast region is comprised of Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

(2) Indexes on a December 1982=100 base.

(3) Indexes on a December 1997=100 base.

(4) Special index based on a substantially smaller sample.

(5) Indexes on a December 1993=100 base.

Note: Index applies to a month as a whole, not to any specific date.
